Fennel
Lesser Burdock
Marjoram
Mugwort
Ploughman's Spikenard
Soapwort
Teasel
Traveller's Joy

AUGUST and beyond

Many late summer flowering plants continue to bloom on into the autumn and winter, especially if the weather is mild.

E.H. Clark

This list of wild flowers was compiled by a resident of Walsingham during her walks with Alfie - a very well behaved terrier.

Their route would take them from the Wells-Walsingham Railway, through the Coach Park, along the Pilgrim Way (old railway line) to The Slipper Chapel, returning along the 'The Holy Mile', the roadway running beside the River Stiffkey and back into Walsingham Village.

There are many routes around Walsingham, and no doubt there are many more wild flowers to discover.

We invite you to wander the paths and by-ways and create your own list!

We trust that you will enjoy your walk through this 'bootiful' part of North Norfolk and hope that you will return soon.
